MACHINES  
AND DEVICES  
PROMOTION PROGRAM

Eima International  
19-23.10.2021

**Polska**

# Welcome

We invite you to become familiar with the offer of Polish companies and to visit the Polish National Stand at Eima International.

POLISH  
MACHINES  
AND DEVICES  
PROMOTION PROGRAM

The Ministry of Economic Development and Technology is pleased to invite all contractors, including the foreign ones and local media to become familiar with the offer of Polish companies and visit the Polish National Stand at the Eima International fair in Bologna, which will take place on October 19-23, 2021.

## Polish Machines and Devices industry:

- ◆ Offers wide range of highly specialized equipment
- ◆ Provides new technologies, excellent quality and cost-saving solution
- ◆ Meets high demand from abroad: export grows by 66,7% (2010-2019)
- ◆ Has many benefits to offer to international partners and contractors

# AGRO-WIKT

PAD 20 Stand B/8bis

Agro-Wikt is a Polish manufacturer with 45 years of tradition on the market, specializing in the production of PREMIUM CLASS SPARE PARTS for Kverneland, Kuhn, Vogel & Noot, Unia, Lemken, Pöttinger, Overum and Grégoire-Besson ploughs. The AGRO-WIKT brand is also well known in many European countries for the production of professional concrete mixers with a capacity of 80 to 320 liters. We distribute our products with our own fleet of cars to 14 European countries. The catalog of our products is systematically extended with new types of articles. We have the ISO-9001: 2015 Quality Management System in place. Our products are widely distributed in Central Europe, and due to the dynamic development of our company, we are currently looking for new markets.

# IVM

## Pad 37 Stand C/13

IVM has been creating innovative image analysis solutions for over 10 years, providing state-of-the-art optical sorters and proprietary vision systems for all industries. The company is constantly growing, acquiring new markets for its business. Currently, the company cooperates with leading Polish and foreign manufacturers in many economic sectors. We have many years of experience in the implementation of projects involving the use of advanced vision technologies with spectral and hyperspectral analysis. The beneficiaries of the projects were both domestic and foreign institutions. The research performed culminated in the building and implementation of systems used in industry. Our unique solutions help increase productivity, reduce costs and ensure consistent high quality.

# MZURI AGRO

Pad 19 Stand B/23

MZURI is an innovative, environmentally friendly strip-till machine that only cultivates narrow strips of soil where fertiliser and seed are sown. This significantly reduces fuel consumption, working hours and CO2 emissions. In addition, it brings a number of beneficial changes to the soil. MZURI cultivators are universal machines, which allow you to sow all crops, rape, legumes, corn, soya, sunflower, flax, poppy, hemp and other.

MZURI is present in more than 30 countries, on 4 continents. It works well in any climate conditions, on any soil, in any crop. MZURI Pro-Til technology is a solution to the current and future challenges of the agricultural industry.

# ATMP1

The ATMP1 company has been operating on the agricultural market since 2007. It started its activity with the production of snow plows for quads. The rapid development resulted in the expansion of the range of municipal machinery and the introduction of accessories for tractors and loaders. The offered products aroused great interest in the domestic market, and shortly afterwards they were offered by foreign dealers. The company's goal is to combine new technologies with proven solutions, as well as to raise the standard of machines by using the highest quality Polish materials, e.g.

- hydraulics and working elements of machines of the Waryński brand;
- replacement of rubber elements with much more durable polyurethane.

# BOGMAR BB

Intuitive IDS application combined with the latest generation of machines creates Magazyn24h - a top level service. The functioning of industrial dispensing machines is based on the latest technologies. The small size of the devices perfectly solves the problem of limited space in factories. Direct connection to the IDS system provides excellent transparency and control of consumed products. The biggest benefit of automating product dispensing is the ability to record product picks in depth, and thus - easy monitoring of costs. Configuration options of the reporting software allow the user to create their own in-depth analyses, facilitating work in the following departments: purchasing, warehouse, occupational health and safety, controlling, and above all, production and maintenance.

# NAMYSLO

The NAMYSLO company was established from a combination of passion and knowledge about agriculture. As a child, the owner of the company, Damian Namysło, was involved in helping with the family farm. Gaining experience in this way, he wanted to build machines that would meet the expectations of farmers, analyzing their needs and ahead of global trends. The first machines were created in an intimate team thanks to the hospitality of the family company run by the parents. From the very beginning, the NAMYSLO company focused on quality and innovative solutions. The characteristic „M” in the company’s logo refers to the knives used in harvesting technology.
